Training

Greetings!

In the newsletter this month, you will find a featured article by Rob Stuart on a variety of issues involving the expanding role of social media in our society. It is an undertaking that Rob took on many months ago, and he put in a tremendous amount of research and time into the article, and was rewarded with the article being selected for inclusion in the FBI Law Enforcement Bulletin.

I think you will find it an interesting article, and we are proud to have Rob on the ICJE Board of Directors.

As always, if you have any ideas or thoughts on topics, specific websites of interest, or other material please feel free to email me at jimrechel@fuse.net, or send an email to me via ICJE.

Thanks also to those who participated in the most recent survey.

Jim Rechel - Newsletter Editor

Social Media: Establishing Criteria for Law Enforcement Use

By Robert D. Stuart, M.S. ,

ICJE Board Member - Rob Stuart

Over the past decade, social media has become a widespread presence that touches the lives of countless people, including law enforcement officers. Certain risks and rewards face officers, as well as their departments, who use social media. Missteps in its use can endanger the safety of officers and compromise criminal cases says Stuart in a recent article in the FBI Law Enforcement Bulletin.

Using Google to Search with an Image

During a recent investigation, investigators were stymied in their attempts to identify the kingpin behind a nationwide debit card fraud. Part of the evidence was a photograph depicting an unknown individual laying on a bed of cash, who was believed to be the mastermind of the fraud. Working through traditional means, witnesses were able to identify the suspect and he was later indicted.

It got me thinking about the use of photos, and searching them in Google, and other services such as TinEye. So I went to a photograph released by the White House, and using the snipping tool available in Windows cut out a portion of the photo. I then saved it to my Pictures file, went to Google, search by Images and searched the Internet for any site with the picture of Michelle Obama.

The results are shown below:

Search by Image

0:04 / 0:42

Four ways to search by image

Drag and drop

Drag and drop an image from the web or your computer into the search box on images.google.com.

Upload an image

On images.google.com, click the camera icon, then select "Upload an image." Select the image you want to use to start your search.

Copy and paste the URL for an image

Found an image on the web you're curious about? Right-click the image to copy the URL. On images.google.com, click the camera icon, and "Paste image URL".

Right-click an image on the web

To search by image even faster, download the Chrome extension or the Firefox extension. With the extension installed, simply right-click an image on the web to search Google with that image.

CrimeDex: An Idea to Consider to Identify Unknown Subjects

In addition to searching the Internet with an image, CrimeDex continues to expand its services for both private and public sector investigators. In another recent case a bank investigator submitted a bank surveillance photo to the CrimeDex database and found many other banks had similar photos of an unknown subject. CrimeDex did the searching automatically, without the investigator having to do anything.

From the CrimeDex website:

CrimeDex is an online network leveraged by thousands of fraud, loss prevention, and law enforcement professionals collaborating to prevent fraud, shoplifting, Organized Retail Crime, and other white-collar crimes. Integrated with 3VR's Video Management Software, CrimeDex allows professionals to share, search, and leverage relevant information on criminals between businesses and law enforcement.

- *CrimeDex members can:*
 - *Solve cases faster with access to information on over 15,000 crimes and suspects nationwide.*
 - *Broadcast information on wanted criminals to groups large or small.*
 - *Link criminals to more than one open case using powerful search and watchlist capabilities.*
 - *Collaborate more effectively between the private and public sectors.*
 - *Share video and images with other CrimeDex members to maximize the utility of your 3VR appliance.*

- Integrated with the 3VR Video Intelligence Platform™

Visit www.CrimeDex.com to experience the next generation of crime fighting

3VR's CrimeDex is an online network of thousands fraud, loss prevention, and law enforcement professionals in more than 40 countries, collaborating to prevent fraud, shoplifting, Organized Retail Crime (ORC), and other white collar crimes. Integrated with 3VR's Video Intelligence Platform™ (VIP), CrimeDex allows professionals to share, search, and leverage relevant information on criminals between businesses and law enforcement.

Flight Tracking and Tail Numbers

Last Wednesday night I happened to notice a small headline about a private jet crash in Thompson, Georgia. Why it caught my eye I don't know, but I clicked on the link to read the article. At the time, I did not know that the crash took the life of a native of Eutaw, Alabama, Tiffany Porter, a 2002 graduate of Warrior Academy. Our thoughts and prayers are with her family and loved ones.

What I did notice, is that the writer of the article included a comment that they knew that the flight had originated in Nashville, TN but that they do not know anything else about the jet or its tail number.

I thought to myself, "Why didn't the writer do five minutes of research on the Internet and find out?"

As a result, I thought it might be important to pass on the resources available to any investigator who may need to find the flight path, tail number or other information on flight. Using the Internet to

Track Private Planes and Flights I use FlightAware, but there are many sites available, some free some charging.

The screenshot shows the FlightAware website interface. At the top, there's a navigation bar with 'FlightAware LIVE FLIGHT TRACKING' and a search bar. Below that, a sidebar on the left contains various navigation links like 'Home', 'About Flight Tracking', 'Join FlightAware', etc. The main content area features a map of the John C. Tune Airport (KJWN) with several flight paths and aircraft icons. Below the map is a table with flight data.
